

MASTER PROPOSAL: STRATEGIC RESTRUCTURING & OPERATIONAL SECURITY

Prepared for Meeting: Monday at 12:00 PM (Noon)

Objective: A list of operational suggestions to safeguard the church property, address community/neighbor concerns immediately, establish ironclad boundaries, and unlock major funding and food resources to elevate the outreach ministry.

1. Executive Summary & The Reality Check

The unified goal of these suggestions is protecting the church property and ensuring the ultimate safety and success of the outreach mission.

- **The Immediate Crisis:** A loose, unstructured environment has invited unauthorized traffic and safety liabilities onto the church grounds. Active outreach to leadership from community members (NIMBY concerns) has officially begun as of this weekend. Furthermore, real-time safety incidents on the property—including a recent animal bite and unauthorized loitering—demonstrate that if illegal, unmonitored, or unrestricted activity continues unchecked, it is only a matter of time before code enforcement, the city, or law enforcement forces a permanent shutdown of the property.
- **The Strategic Shift:** By establishing strict operational security and accountability, the church can confidently answer neighbor complaints while serving as a secure fiscal and legal "umbrella." This structure allows the ministry to secure major food pipelines and federal grants that are currently impossible to access due to the lack of boundaries.

2. On-Site Residential Strategy: "The Groundskeeper" Suggestions

To completely dismantle the high-risk "camp" dynamic forming behind the church buildings, these suggestions focus on terminating loose outdoor arrangements and formalizing shelter indoors.

- **Indoor Transition Suggestion:** Move any approved individual(s) currently permitted to stay on the property out of tents/outdoor spaces and into a specifically designated, secure room within the church buildings or the garage.
- **The Groundskeeper Role:** Frame their presence on the property as an official, protective property-watching role answering directly and solely to the pastor.
- **Strict Curfew & Guest Restrictions:** Suggest establishing a rigid curfew with a zero-tolerance, absolute ban on outside guests or visitors in the residential space. If unauthorized traffic (such as known drug dealers or buyers) is permitted into the area by a resident, their residential agreement is terminated immediately with no second chances.

3. Security Infrastructure & Property Boundary Suggestions

Relying on easily compromised consumer technology or loose boundaries leaves the property, the congregation, and the pastor blind to predatory or illegal behavior on the grounds.

- **Hardwired CCTV vs. Wi-Fi:** Standard consumer Wi-Fi cameras (like the current parking lot camera) are highly vulnerable to being hacked, bypassed, or monitored by bad actors. We suggest transitioning to a completely closed-circuit television (CCTV) system.
- **Camera Coverage:** Install hardwired cameras along the interior hallways of any residential/outreach spaces, as well as covering the dark back sections of all three church buildings and the garage.
- **Direct Feed to the Parsonage:** Run the live video feed directly into the pastor's home on the backside of the property so he can monitor activity in real-time.
- **Immediate Trespassing:** Any individual caught on the property after hours who is not an approved resident, or who lacks explicit, pre-approved permission from the pastor, will be legally trespassed immediately.
- **Immediate, Budget-Friendly Theft Prevention:** To protect high-value assets without an immediate financial burden, we suggest installing standalone magnetic window/door alarms (available affordably at Dollar Tree) on doors leading to the audio room, lighting booths, main offices, and any other restricted rooms housing church assets.
- **Strict Group Privacy & Loitering Ban:** What is shared within the recovery and support groups is strictly confidential and no one else's business. To protect the privacy of those inside, there must be a zero-tolerance policy for hanging around or loitering near the front or back doors of the group rooms. Activities like washing bicycles or congregating outside during group hours are strictly prohibited. The property must remain completely clear and quiet while groups are in session.

4. Tightened Outreach Day Protocol Suggestions

The current unstructured timeline allows the environment to stretch far too late into the evening, creating an unsafe atmosphere and causing a loss of vital volunteers. The outreach days must be run on a tight, predictable schedule with strict zone controls.

SUGGESTED STANDARDIZED OUTREACH TIMELINE (MON / WED / FRI):

- 2:00 PM – 3:30 PM | Check-In Window:** A hard cutoff. Anyone arriving after 3:30 PM is denied a shower and sit-down food.
- 3:30 PM | Food & Grace:** Service begins exactly on time. To-go plates are strictly limited to those who went through the formal check-in process.
- 4:30 PM | Shower Cut-Off & Open Service Close:** All open shower and food facilities are completely shut down. Outdoor property and shared areas must be cleared immediately.
- 4:30 PM – 6:30 PM | Group Sessions:** The indoor group sessions meet for their designated 2-hour timeline.

4:30 PM – 5:00 PM | Targeted Facility Clean-Up: Running simultaneously with the start of groups, the designated cleanup crew transitions the shared space out of outreach mode.

6:30 PM | Group Conclusion: All groups finish. Shared spaces are entirely vacated.

6:30 PM – 7:00 PM | Property Sweep (Led by Lawrence): Lawrence conducts a thorough physical walk-through and sweep of the entire property to ensure all participants have safely exited the grounds.

7:00 PM Sharp | Hard Lockdown (Executed by the Pastor): The Pastor physically walks over at 7:00 PM to perform the final hard lockdown of all building doors, ensuring regular executive oversight on-site to verify the property is secure.

THE 4:30 PM TRANSITION PROTOCOL (PROPERTY MANAGEMENT):

To ensure absolute federal compliance while completely eliminating the issue of participants taking resources and loitering on-site, the church must enforce a strict "Clear the Grounds" operational protocol at 4:30 PM:

- **The Policy:** Open outreach hours end sharply at 4:30 PM. At this time, all participants must immediately transition into one of three structured tracks:
 1. Go directly inside to participate in the voluntary **Group Session**.
 2. Join the scheduled, staggered **Facility Cleanup Crew** to give back to the program.
 3. **Promptly and completely vacate the church property** for the remainder of the day.
- **Enforcement:** Lingering out front, loitering by the back doors, or utilizing church property for personal tasks (such as washing bicycles) during group hours is a strict violation of property boundaries. Participants who refuse to transition into a structured indoor track or leave the property will be subject to the formal Accountability Enforcement System (The 3-Strike Rule).

THE 3-STRIKE ACCOUNTABILITY ENFORCEMENT SYSTEM:

To handle violations of property rules, safety protocols, loitering boundaries, or asset theft (such as failing to return towels), a progressive disciplinary system will be tracked at the check-in desk:

Strike 1 (Immediate Restriction): The participant loses all privileges and access to outreach services (showers, food, and clothing resources) for the **remainder of the current week**.

Strike 2 (Extended Restriction): A second offense results in a total suspension from all outreach services and property access for the **remainder of the calendar month**.

Strike 3 (Permanent Removal): A third infraction demonstrates a refusal to respect the church environment. The individual will be **officially and legally trespassed from the church property permanently**, and law enforcement will be called if they return.

THE STAGGERED GENDER GROUP CLEANUP STRATEGY:

To solve the current volunteer shortage and ensure the facility remains fully compliant without burning out the team, we suggest leveraging a staggered schedule:

- **Wednesday Schedule (Male Group / Female Cleanup):** The male group starts promptly at 4:30 PM. Because the female outreach participants do not have group on this day, they are organized to handle the 4:30 PM cleanup duties for the shower facilities and the dining room.
- **Friday Schedule (Female Group / Male Cleanup):** The female group starts promptly at 4:30 PM. The male outreach participants do not have group on this day, so they are organized to handle the 4:30 PM cleanup duties.
- **Benefit:** This structure provides a predictable pool of extra help, prevents volunteer burnout, and teaches personal responsibility and investment to the participants.

STRICT ANIMAL & PET LIABILITY POLICY:

Following a recent, highly dangerous incident where a dog bit a woman on the property while the owner was getting food, a strict animal safety boundary must be enforced to protect the church from massive legal, financial, and physical liability:

- **No Inside Pets:** Absolutely no personal pets or animals are allowed inside any of the church buildings at any time.
- **No Property Accommodations:** To protect the church from premises liability and active negligence claims, the church **will not** provide tie-out anchors, kennels, or dedicated animal stations on church grounds.
- **Playground Zone Isolation:** Animals are strictly prohibited from being tied up, held, or allowed anywhere near the playground, entrance doors, or shared walkways of any building being used for the outreach. The entryways and youth areas must remain completely safe, clear, and unthreatened.
- **Personal Control Only:** Any participant with an animal must keep the animal on a personal, hand-held leash under strict physical control at all times outside the main service zones.
- **Enforcement:** If an animal exhibits any signs of aggression (growling, lunging, snapping) or if an owner leaves an animal unattended or tied to church property (fences, trees, or posts), it will result in an immediate **Strike 1** violation under the 3-Strike System, and the owner must remove the animal from the property immediately.

KITCHEN SECURITY & FOOD SERVICE SUGGESTIONS:

To eliminate chaos, ensure safety, and protect food assets during outreach hours:

- **Restricted Kitchen Access:** The kitchen should be strictly for authorized volunteers. Participants and unauthorized individuals are completely barred from entry.
- **Door Lockdown:** The kitchen side door must remain locked at all times during outreach. The main kitchen door must remain closed. If the layout prevents the door from closing securely, a designated volunteer must remain stationed in the kitchen at all times to act as a gatekeeper.

- **Volunteer Dining:** Volunteers who wish to eat during outreach must do so inside the secure kitchen area, keeping the volunteer team centralized and separated from the main floor chaos.
- **Controlled Food Serving (No Buffets):** Shifting away from a self-serve buffet line, 1 to 2 designated volunteers must be stationed on the food line to personally plate and serve the meals. This manages portions, prevents resource hoarding, and ensures fair distribution.

ASSET ACCOUNTABILITY & RESOURCE HANDOUT SUGGESTIONS:

To halt the rampant theft of church property (such as the recent theft of 8 towels) and enforce personal accountability:

- **The Check-In Handout:** When an individual checks in for a shower, they are simultaneously issued their care package (hygiene items like soaps, toothpaste, etc.) along with one towel and one washcloth.
- **The Sign-Out Protocol:** The care package items are theirs to keep. However, the towel and washcloth are officially logged on a strict sign-out sheet.
- **Towel Return Enforcement:** The issued towel and washcloth must be returned immediately following the shower. Failing to return church property will immediately trigger a Strike under the 3-Strike System, beginning with suspension for the remainder of the week.

5. Unlocking Resources: The Church "Umbrella" Opportunity

This section shifts the conversation from defensive security to major structural expansion, presenting opportunities for the Pastor to scale the ministry's reach through structured rules.

- **USDA Federal Grants:** With the church acting as a stable fiscal and administrative umbrella, the ministry can apply for community and food donations through USDA grant programs to fund Lawrence's 501(c)(3) outreach. Because federal funding requires precise data, accountability, and strict timelines, the current loose operation makes the church entirely un-grantable. Tight boundaries make the ministry fundable and eligible for established institutional distribution networks.

6. Umbrella Compliance Requirements: Keeping the Outreach Eligible

In order for the church to act as a fiscal umbrella and maintain total compliance for USDA grants and corporate food distribution programs, Lawrence's outreach must adhere to the following strict operational standards:

- **Anonymized Data and Headcount Tracking:** Grant providers do not require personal IDs for people eating, but they *absolutely require* precise data. The outreach must track exactly how many meals are served, how many unduplicated individuals are helped each week, and general demographics. A loose headcount is a compliance violation; an official ledger is required.
- **Strict "Firewalled" Bookkeeping:** If the church accepts grant funds or cash donations on behalf of Lawrence's 501(c)(3), those funds cannot be mixed with the general church tithe or building funds. The church treasurer must maintain a completely segregated line item in the accounting books specifically

earmarked for "Food and Fellowship Outreach." Every receipt for food, care packages, or supplies bought with grant money must be turned in and filed.

- **Health and Safety Compliance:** To utilize food from federal or professional pipelines, the kitchen must maintain standard food safety compliance. Food must be stored at proper temperatures, and volunteers handling food should be basic food-handler certified (usually a quick, free online training).
- **Civil Rights/Non-Discrimination Compliance:** To receive USDA or federal umbrella support, the outreach must visibly post a standard USDA "And Justice for All" non-discrimination poster in the dining area. It guarantees that food is given out freely without requiring religious or programmatic participation.

Closing Statement: Our Personal "Why"

"Pastor, we are handing you these suggestions because we care deeply about you, Lawrence, and the survival of this church. The phone call from the neighbor this morning proves that we are out of time—the neighborhood is watching, and the current structure is a liability. Some of us have lived through this exact scenario in our pasts. We know precisely how predators operate, and they do not care about this faith, this building, or this ministry. We have watched people lose everything—including their lives—to this exact cycle. Lawrence is already losing volunteers because of the current chaos, and we cannot in good conscience remain involved if the property is left unsafe. We want to help you build something that lasts. By bringing approved residents inside, clearing the outdoor grounds at 4:30 PM, locking down at 7 PM, locking down the kitchen, utilizing our participants for staggered cleanup, protecting group privacy, enforcing a strict animal safety policy, implementing a 3-strike progressive accountability system, using budget-friendly asset protection, and utilizing hardwired CCTV, we turn this from a dangerous liability into a premier, fully funded ministry. We want to give you the exact framework needed to protect this property and make this outreach truly safe and successful."
