

Farm Master Plan (Zone-Based System)

Zone 2 – Crops & Public Access (Outer Ring)

Purpose: Public interaction, food production, and education.

Includes: Entry parking, farm stand, training center, teaching beds, and production fields.

Crops divided into two rings: Inner (greens, beans, squash) and Outer (potatoes, corn).

Public remains in this zone for safety and biosecurity.

Zone 1A – Core Operations & Living Hub

Purpose: Central command, housing, and operational support.

Farm Manager House: 4 bed / 3 bath modular with front deck (public side) and back deck (operations side), hatchery addition, and enclosed pool.

Bunkhouse: 3 rooms, capacity 2–12, with 2 bathrooms (dual vanities and dual showers).

Includes equipment storage, LGD control area, and two septic systems.

Utilities include well system, electrical system (300–400 amp), and generator readiness.

Zone 1 – Livestock Core

Purpose: Animal production and closed-loop nutrient system.

Central pond serves waterfowl (ducks, geese) and anchors the system.

Includes poultry, goats, pigs, and cattle arranged around the pond.

Compost area located at outer edge of this zone.

No public access allowed due to safety and LGD presence.

System Overview

Three-tier distribution: Tier 1 (schools/farm stand), Tier 2 (residents/homeless), Tier 3 (livestock feed).

Circular layout: Zone 2 (outer) → Zone 1A (middle) → Zone 1 (center).

Perimeter vehicle loop supports efficient transportation and movement.
